Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163 (a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More specifically:

A. Applicant is requested to indicate whether the parent cultivars '92839' and '92864' have been patented in the United States, are currently the subjects of pending U.S. plant patents applications, or not patented. If patented, --(U.S. Plant Patent No.)-- should be inserted after the appropriate cultivar name. If subject of a pending

Art Unit: 1661

application, such should be referred to by serial number. If not patented, --(not patented)-- should be inserted after the appropriate cultivar name.

B. Applicant should be descriptive with the comparison between the parents and the observed plant, 'Picasso' in how it differs from each other and other known cultivars.

C. On page 2, lines 17-19, it is not clear as to what Applicant is describing in "Size 9-12", "Size 12-15" or "Size 15-18". Clarification is needed.

D. Applicant should disclose the length and diameter of the observed plant's branch.

E. On page 2, line 21, the recitation "Character: Many, like the variety 'Celeste.'" does not describe number of branches of the observed plant. Clarification is needed.

F. Applicant should disclose a color chart number for the whitish specks that are visible on the observed plant's leaf.

G. On page 2, lines 32-33 and page 3, lines 8-12, it appears that Applicant has disclosed different color chart numbers for the leaves. However, Applicant could be describing the color of the petiole (page 3, lines 8-12), which if this is the case, the term "Color" should be indented under "Petiole" to adequately describe the color of petiole.

H. On page 3, lines 24, 28, 31, it appears there is a color reference letter missing from "RHS 76". There should be an --A--, --B--, --C--, or --D-- after the numerical reference. Correction is needed.

The above listing may not be complete. Applicant should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

Claim Rejection

35 U.S.C. § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
